

GRAN PARADISO GOAL

It's the only 4000m entirely in Italy : the famous Gran Paradiso, with wide glaciers and accessible slopes, is an emblematic summit but reachable.

Surely an ideal destination to cross the mythical 4000m mark for those who dream about peaks and altitude. From the Valsavarenche valley in Italy, we slowly start climbing to our first refuge, Chabod (2750m). It will then be the big ascent day of this National Park monarch, Gran Paradiso, at 4061m altitude. Beautiful glacial run with a rocky end to arrive at the statue of the Virgin Mary at the peak. We will be fulfilled whilst descending to the refuge Victor Emmanuel II.

On our last day we return to the valley, in the village of Pont. Lovely descent amongst flowers and larches. We will contemplate the Gran Paradiso massif from a nice and easy summit, the Tresenta (3609m) before descending to the valley.

Budget & exchange

Italy and France are in the Eurozone. Therefore, the unit of the currency is the Euro.

Credit cards and debit cards are very useful for cash advances (but don't forget to bring your PIN number!).

Also, refuges often don't have EPT (Electronic Payment Terminal): it is best to bring cash.

Be aware of the fees usually applied when purchasing products or services on a credit card.

Always take more rather than less, as you don't want to spend your trip constantly feeling short on funds.

As currency exchange rates can often fluctuate, we recommend to check the following website for daily exchange rates: <https://www.xe.com/>

Weather

The best time of year to climb Gran Paradiso is from June through September. However, the weather here is still decent enough for ascents in the late spring and early autumn as well. Indeed, during the summer months, the average temperatures on the mountain fluctuate between 8°C to 12°C, but once you reach the glacier and above, it gets much colder. Temperatures at the base of the mountain are generally around 20°C. Thus, we recommend to dress in layers.

While temperatures do not drop too much during the spring and autumn, it is definitely cooler and will require warmer clothing than the summer.

Late spring and early summer is when it precipitates the most in this area. While the weather is generally clear, squalls and afternoon thunderstorms are not uncommon.

July through October are generally drier than May and June.

Electricity

There will be electricity in most places you will stay. If you are scared to run low on battery, we advise to bring an external battery charger.

Power plugs in France have the particularity of being male and female at the same time : they have 2 prongs and a receptacle. If you need an adapter, please purchase it before departure. In France the power plugs and sockets are of type E. The standard voltage is 230 V and the standard frequency is 50 Hz.

For Italy there are three associated plug types : types C, F and L. Plug type C is the plug which has two round pins, plug type F is the plug which has two round pins with two earth clips on the side and plug type L is the plug type which has three round pins. Italy operates on a 230V supply voltage and 50Hz. Check that you can use your personal electrical appliances safely whilst abroad. If not, you will surely need the use of a travel adaptor.

Local time

France and Italy are in the Central European Time Zone. Central European Standard Time (CET) is 1 hour ahead of Greenwich Mean Time (GMT+1).
